

MEET NOOKSTEP

Laurel studied all night. What did she learn?

Nookstep turns “I should study” into one clear next step.

PROBLEM

Independent study lacks structure, reflection, and continuity

Unclear Goals

Students struggle to convert open-ended study topics into concrete finish lines.

Limited Reflection

Timers ring without evaluating what was actually remembered or completed.

Lost Momentum

Resuming next session creates friction due to forgotten stopping points.

That was Laurel’s night, and it’s a normal night for many students.

WHO WE'RE BUILDING FOR

Starting with university students and independent learners.

- University students preparing for exams and coursework.
- Students learning new skills independently.
- Learners who need clearer study goals and a way to continue their progress.
- High school students (future audience).

OUR SOLUTION

A gamified study companion that turns study plans into focused action.

- Create Study Quests with specific goals and durations.
- Choose Understand, Practice, Remember, or Review mode.
- Optionally reflect on completed sessions and save a Next Step.
- Earn coins from completed quests and customize a personal isometric study room.

HOW IT WORKS

From study intentions to clear next steps.

1. PLAN — Set a specific study goal, mode, and duration.
2. FOCUS — Work on the task using the focus timer.
3. REFLECT — Optionally write what you remember.
4. CONTINUE — Optionally save the next action for a future session.
5. REWARD — Receive coins for completed quests.

YOUR SPACE. YOUR GOAL. YOUR NEXT STEP.

Make space for your first step.

Start with a small goal. Make this space your own.

Make a space of your own

BEYOND THE TIMER

More than tracking study time — Nookstep connects study sessions with meaningful next actions.

TIMER-ONLY WORKFLOW

- Set a timer.
- Study until it ends.
- Start again next time.

THE NOOKSTEP WORKFLOW

- Define a specific finish line.
- Focus on the task.
- Reflect on progress.
- Save the next action.
- Return with context and motivation.

We don’t just help students finish a timer. We help them know what to do next.

MARKET OPPORTUNITY

Start with students. Grow with learning communities.

TARGET USERS
University students and independent learners.

INITIAL MARKET
Students in Myanmar, beginning with university communities.

POTENTIAL EXPANSION
High school learners, educational communities, and learning centers.

BUSINESS MODEL

Freemium: Free to start, more to unlock.
Free today. Exploring sustainable growth.

FREE CORE EXPERIENCE
- Free Study Quests and focus sessions.
- Earn coins through completed quests.
- Use coins to purchase room decorations.

FUTURE: OPTIONAL PREMIUM FEATURES
- Premium customization collections.
- Additional study-planning tools.

FUTURE: EDUCATIONAL PARTNERSHIPS
- Explore partnerships with learning centers and educational organizations.

WHAT WE'VE BUILT

From concept to a deployed, functional MVP.

CORE STUDY EXPERIENCE

- User accounts and authentication.
- Study Quest creation and focus timer.
- Optional Learning Checks and Next Steps.

GAMIFICATION AND CUSTOMIZATION

- Coin rewards for completed quests.
- Shop with 21 products.
- Customizable isometric study room.
- Persistent study progress and room layouts.

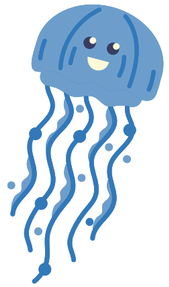

NEXT STAGE: REAL-USER VALIDATION

- Improve registration and email confirmation.
- Test Nookstep with university students.
- Collect feedback and measure return usage.

TEAM & THE ASK

SIRENS & KNIGHTS

Our Team
A seven-member student team that designed, developed, and deployed Nookstep.

Our Achievement
Built a functional MVP using Next.js, React, TypeScript, Supabase, and Vercel.

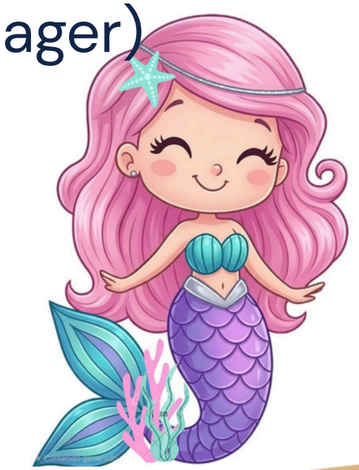

What's Next
Improve account onboarding, conduct real-user testing, and refine the experience based on feedback.

Our Ask
Mentorship, constructive feedback, and opportunities to connect with student testers.

TEAM MEMBERS AND ROLES

Kay Thari	(Business Analyst, Business Owner)
Kyal Sin Su San	(Business Owner)
Linn Latt Eain	(Product Designer, UI Designer, UX Designer)
Wint Kyi Phyu Kyaw	(Product Owner, Project Manager)
Chan Myae May	(Frondend Developer)
Htet Aung Myin	(Backend Developer)
Ye Htut	(Full Stack Developer)
